

## Task 6

In this lab, you'll be working on Apriori and PCY Algorithms on the following two datasets:

- 1) data/groceries.csv
- 2) data/online\_retail.xlsx

The 1st dataset is already provided, and the 2nd dataset can be downloaded from:

<http://archive.ics.uci.edu/dataset/352/online+retail>

The Apriori algorithm implementation part is already given in the following reference links. Your job is to implement PCY algorithm on the same two datasets and run the notebooks for Apriori to understand its logic.

Reference Links:

- 1) <https://www.geeksforgeeks.org/apriori-algorithm/>  
(for understanding the apriori algorithm)
- 2) <https://www.geeksforgeeks.org/pcy-algorithm-in-big-data/>  
(for understanding the pcy algorithm)
